

# Propagator

*"Harford's are easy to work with. Their Propagator has improved and streamlined our nursery production."*

## *The compact greenhouse that gets your business growing*

- Modular construction - 6m wide.
- Corrosion resistant galvanised steel frame. Powdercoated.
- Proven design, has withstood the worst storms.
- Top quality greenhouse films, 150mu or 200mu.
- Inflated twin skin, cuts heating costs.
- Harford two piece Cliplock reusable film fastening.
- Steep truss - no condensation drip.
- Single or double gull-wing ridge vent.
- Sideroller vents easily fitted.
- Simple on-site construction.

# Propagator

The Harford Propagator range is the perfect design and size for small nurseries, propagators and smallholdings. Built to exactly the same design and engineering excellence of the Harford Maxi Span, the Propagator is available in standard sizes from 6m x 6m. Computer analysed design and engineering is proven to withstand winds up to 40m/sec without structural damage.

The Propagator comes complete with single or double ridge vent for maximum ventilation. Other ventilation options are also available.

Harford's unique modular design means the 6m wide Propagator can be built to any length, in multiples of 3 metres. Future expansion is easy with our modular construction: start small and expand your greenhouse as your business grows.

The Propagator features the same proven steel galvanised frame as all Harford greenhouses, finished in a corrosion resistant white powdercoated finish for maximum durability, longer cover life and smart appearance. Cliplock two piece plastic cover fasteners

and sleeve connectors means fast, easy erection and reusable inserts.

Harford Greenhouses use only the very best covers: Wide film 200mu gives you the choice of inflated twin-skin films for greater heat retention, higher light levels and thermal efficiency.

Side roller vents are available as an optional extra and extra doors can also be fitted. Erecting the Propagator is easy: Do-it-yourself or use our own experienced building team for a fast, precise, low-cost service anywhere in New Zealand.

The Harford Propagator - a professional greenhouse to start your business growing.
